

AMENDMENTS TO THE SPECIFICATION

Please replace the fifth full paragraph on page 8 with the following amended paragraph:

Further, the first tubular yoke 4 is applicable to plural types of fuel pumps of which required specifications are different only by varying a length of the ~~first~~first tubular yoke 4, so that it comes to be also possible to use the second tubular yoke 5 commonly with respect to plural types of fuel pumps.

Please replace the last paragraph on page 17 with the following amended paragraph:

In the case of molding the magnet 2h or the magnet 2m by injection molding, when a gate portion 90 having been made at the time of molding is used as a convex portion of the magnet 2h of FIG. 5(d) or the magnet 2m of FIG. 5(f), the gate processing becomes preferably unnecessary. A gate portion 90 in this case is 1 to 2.6 mm in diameter or side, and is of a cylindrical or prismatic configuration of approximately 1 mm in height.
